WESTERN RESPONSE
SECTION

Re: Virginia Scrap Iron and Metal
Roanoke Avenue Site
City of Roanoke, Virginia

Dear Ms. Torres:

Mr. Dodd's letter of November 7, 1994, directed to Mr. Golden of Virginia Scrap has just arrived on my desk. By that letter, Mr. Golden was advised that certain financial information was expected within seven days in a format set forth in certain attached forms. The financial data necessary to complete this form cannot be gathered and assembled within the prescribed time period. This company does not generate reliable financial reports other than on a year-end basis and then it is normally several months after the accounting year before the information can be made available. Nevertheless, in an effort to accommodate your request, we are assembling the information as best we can.

By this letter, we would again renew our request that we be provided with information describing the expectations of your Agency so that we can assess further a commitment of voluntary compliance.

I am available to discuss this at anytime at your convenience and look forward to hearing from you.

Very truly yours,

GENTRY LOCKE RAKES & MOORE
